Summary

Full Stack Software Engineer with over 5 years of experience, specializing in mobile development with Flutter and web development with React and Vue.js. I have successfully designed, developed, and deployed more than 10 mobile applications on the Google Play Store and Apple App Store, including the main application for an international startup (NeaterNotes). I am an expert in the complete software development lifecycle, from architecture to backend service integration. I am looking to apply my technical expertise to build scalable, high-performance mobile solutions.

Education

International Bachelor's degree

Teodoro Gómez de la Torre Educational Unit

Ibarra, EC

Graduation Date: September 2020

Information Technology Engineer

Pontifical Catholic University of Ecuador - Ibarra

Ibarra, EC

Graduation Date: August 2024

Experience

Home Team Network

Ibarra, Ecuador (In-person)

Dec. 2025 – Present

- Mobile Developer specializing in Flutter, Swift, and Kotlin, focused on maintaining existing products, resolving bugs, and updating them to ensure maintainability.
- Additionally, leading the mobile development of the new iScore app for 2026.

Ibarra Higher Technological Institute

Ibarra, Ecuador (In-person)

Flutter Mobile Applications Instructor

May 2025 – Sep 2025

- Plan the final level classes for software students by updating the content.
- Updated learning by implementing GIT version control and contiguous app deployment.
- Teaching the Dart language and Flutter framework with good coding practices.
- Projects based on layered architecture in Clean Code, and state management in Flutter.

NeaterNotes

Boston, US (Remote)

Full Stack Mobile Developer

Sep. 2024 – Sep. 2025

- I developed a user-centric mobile application using Flutter, applying scalable and maintainable design principles.
- I integrated Firebase services such as authentication, Firestore, Cloud Functions, and cloud storage.
- I managed the entire publishing process on the Google Play Store and Apple App Store.
- I implemented a freemium/premium business model with payment gateways (RevenueCat/Stripe), managing subscriptions and in-app purchases
- I implemented good agile development practices, ensuring continuous and quality deliveries.
- I participated in design, architecture, and implementation decisions to ensure system scalability.

Cry.code

Ibarra, EC

Web/Mobile Software Engineer – Freelance Software Developer

Apr. 2021 – Present

- I designed, developed, and published a portfolio of 7+ mobile and web applications for various clients, using Flutter, React, and Vue.js.
- I improved data collection, tracking, and analysis using the Google Ads and Admob platforms.
- I acted as a Full Stack developer, implementing serverless backends with Supabase and Firebase (Auth, Firestore, Functions)
- I integrated third-party APIs and relational (PostgreSQL, MySQL) and non-relational (MongoDB) databases according to the requirements of the project.
- I ensured efficient transitions between design and production through clear and detailed documentation.
- I ensured efficient transitions between design and production through clear and detailed documentation
